STEP 2:

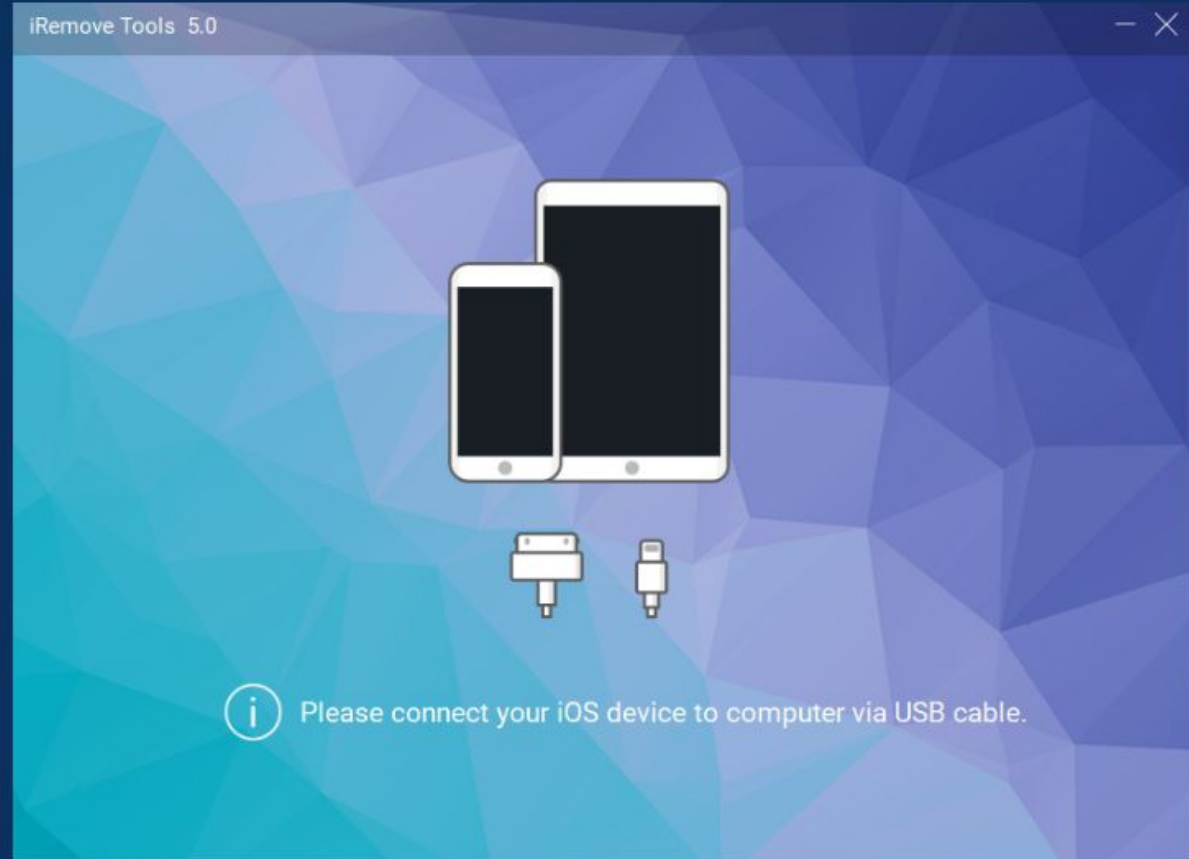

Launch iRemove Tools

Congratulation, iRemove tools software is ready to work!

Now you need to connect your device to PC via USB and iRemove will verify iDevice compatibility*

*** Why you need to verify your device?**

iRemove tools can bypass (remove) Apple ID only from activated device which has access to general settings. To prevent false orders of not supported iDevice, a software must firstly check whether it can help you to remove Apple ID from device or not!

iRemove Tools

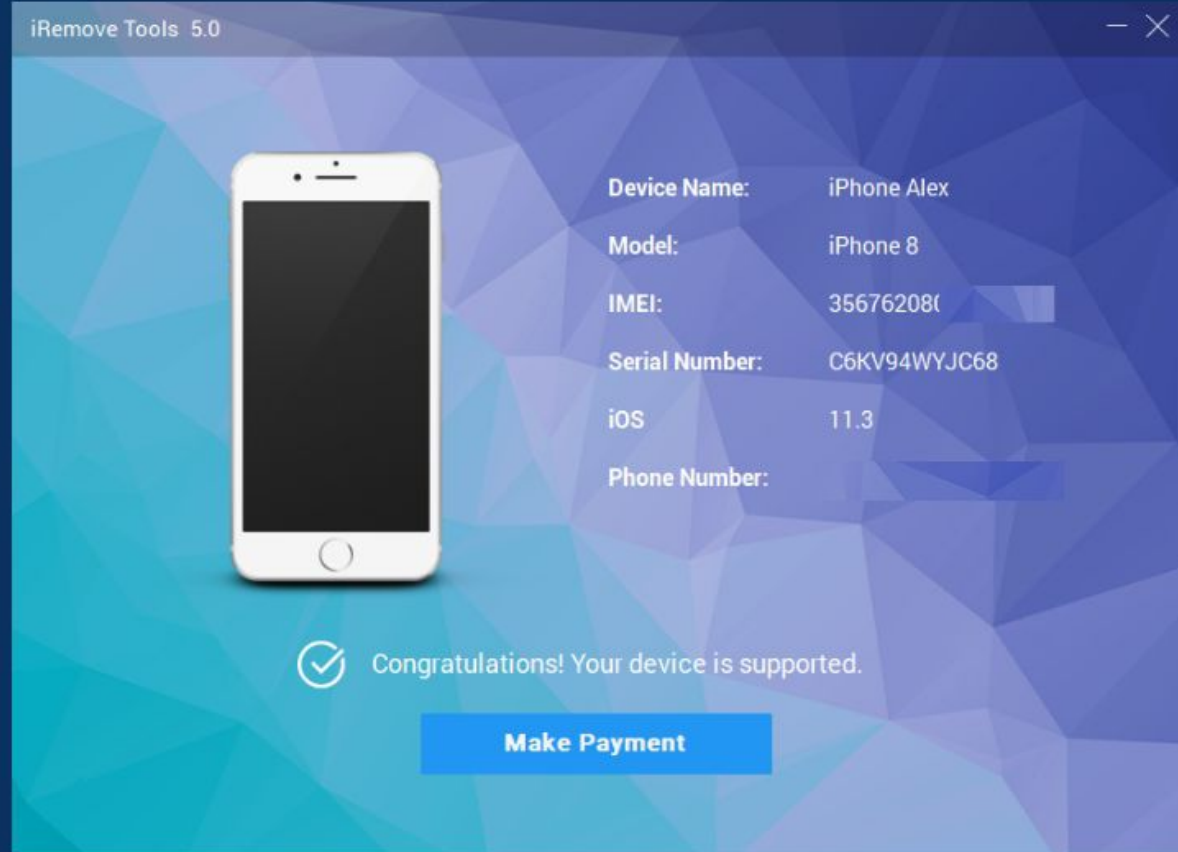

STEP 2:

Your device is supported!

This message means that you can remove Apple ID from your iDevice by using iRemove Tools.

To remove Apple ID click "Make Payment" button, place an order and pay for it.

Your IMEI or Serial Number will be added to iRemove database and you will be able to use iRemove to bypass Apple ID from device as soon as payment is completed.

iRemove Tools

STEP 2:

Your device is NOT supported!

We apologize for the inconvenience, But this message means that you can't remove Apple ID from your iDevice by using iRemove Tools.

Why I can't remove Apple ID from my iDevice?

In this case your device is on activated iCloud screen or device is in LOST or Erased mode. Unfortunately in this case iRemove tools can't help to you.

iRemove Tools

STEP 3:

Place Order & Bypass Apple ID

Now you are ready to place order and start use iRemove Tools! After verifying device your IMEI or Serial number will be added to iRemove DB like supported and you will be able to make payment.

How and where I can pay for service?

1. Open payment page in browser by click "Make payment" button from iRemove Software.
2. After verification, we will inform you via email and send you the link to the invoice.
3. You can place order direct from <https://iremove.tools/>.
