

Customer Guide

iRemove Software
Bypass Activation Lock Screen

Start using iRemove Software

iRemove Dev Team has developed a step-by-step User's Guide on how to use iRemove Activation Lock Screen Bypass Software

1

Download & Install iRemove
Software from
<https://iremove.tools>

2

Verify device & Place Order

3

Jailbreak device & Bypass
Activation Lock Screen

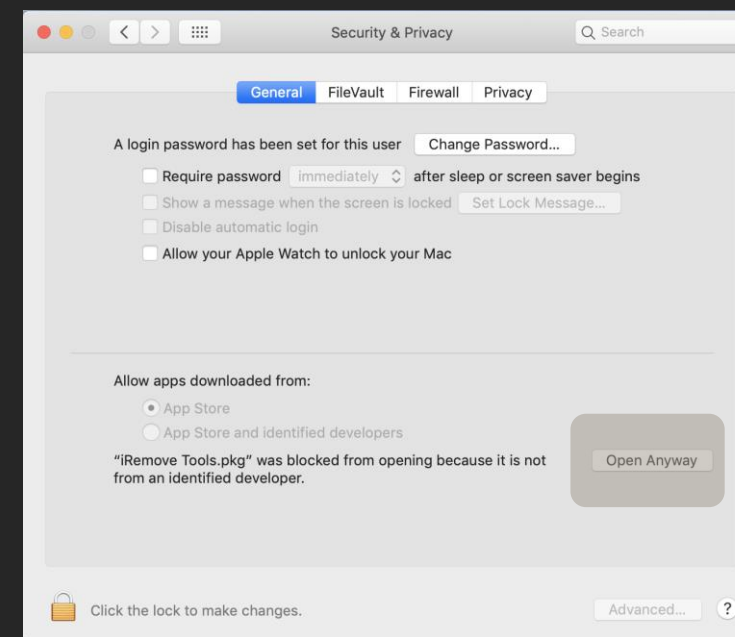

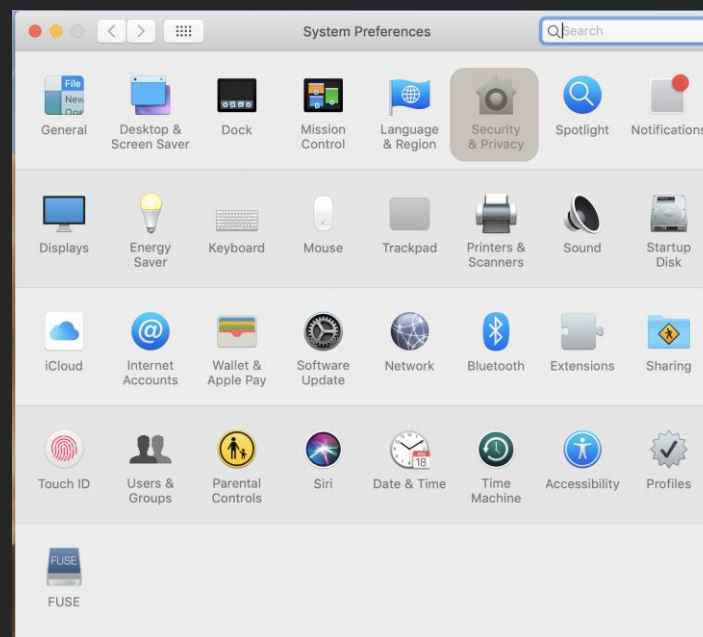

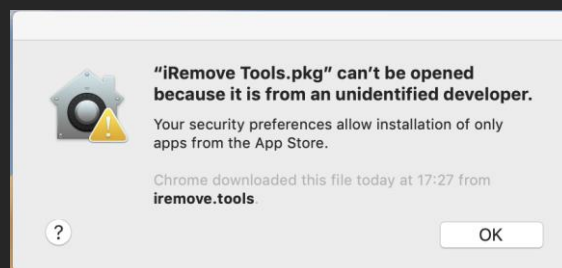

1

Download & Install

Download Software from <https://iremove.tools>.

Click the right mouse button on the app icon and select “Open”. Make sure full permissions are granted to the app:

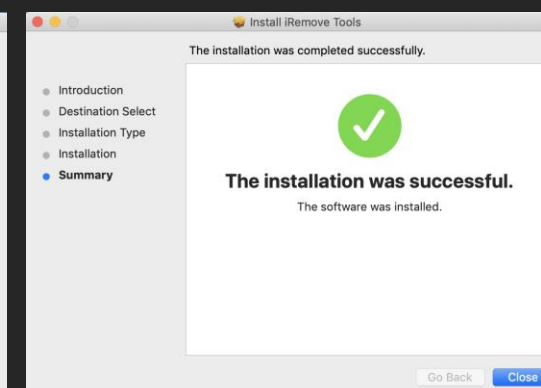

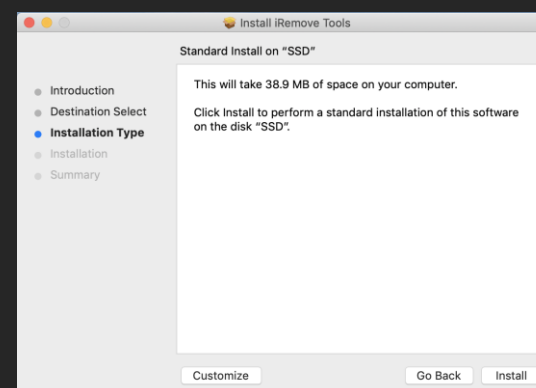

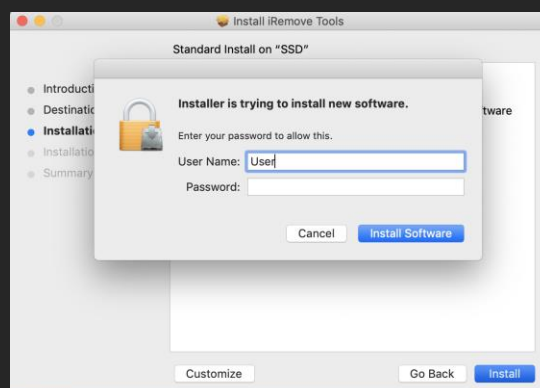

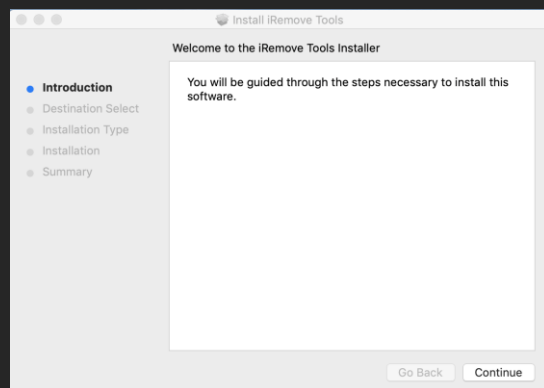

1

Download & Install

Install iRemove Software:

1. Click on “Continue” button in Introduction step;
2. Allow the software installation on your Mac by entering your password;
3. Install by clicking on “Install” button;
4. Summary step - Complete installation by clicking on “Close” button and run iRemove software from app menu.

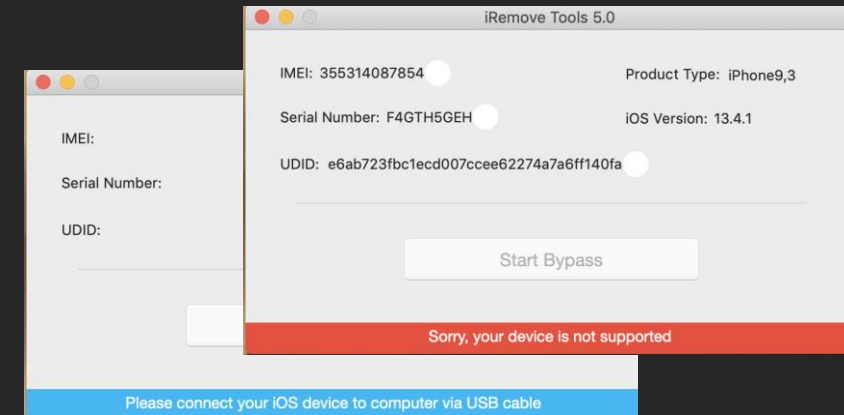

2

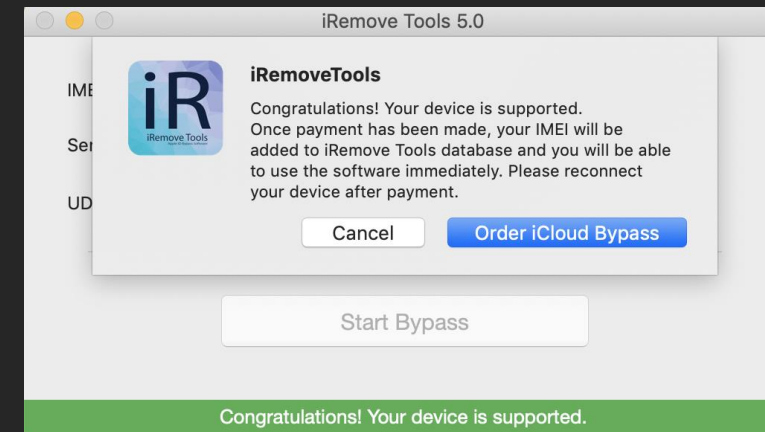

Verify Device & Place Order

Run iRemove Software. Click on the App's icon or Launchpad and open iRemove Software. Connect you iPhone or iPad to Mac PC with USB cable.

iRemove Software will check your device's compatibility. If your device is supported, the software will detect it and redirect you to the payment page. Otherwise, the software will notify you that your device is not supported!

2

Verify Device & Place Order

Place your order and pay for it.

We accept VISA, MASTER and American Express payments card.

After your payment is cleared, IMEI or Serial Number of your device will be permanently added to iRemove Software database and you'll be ready to immediately use the software and bypass iCloud Activation Screen on your device.

3

Jailbreak Device & Bypass Activation Lock Screen

After your payment is done, reconnect your device. Following message will appear in case your device is supported, but is not jailbroken.

Click on the right button “Run Checkra1n jailbreak” to run Checkra1n. Checkra1n will detect the device connected to Mac PC.

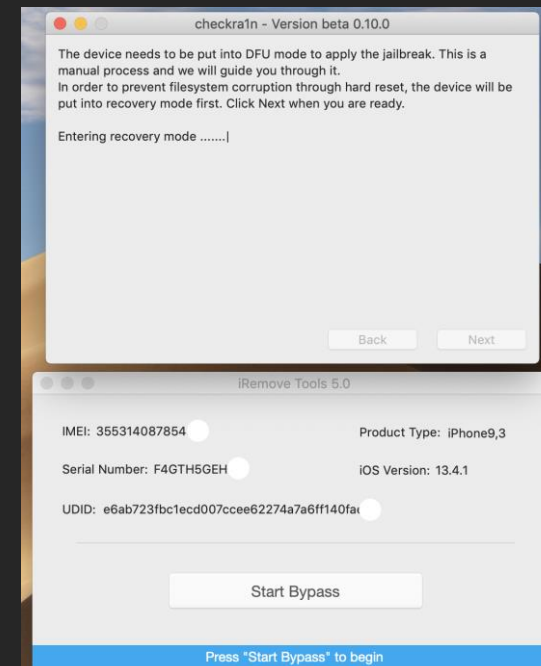

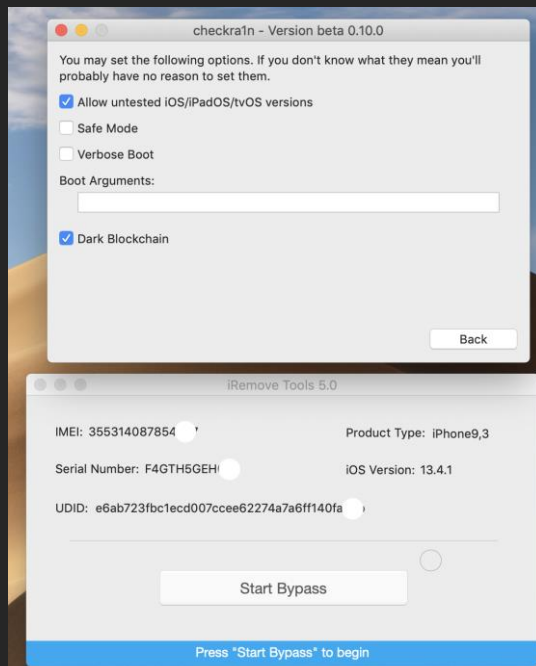

3

Jailbreak Device & Bypass Activation Lock Screen

Click on “Option” button. New opened screen will display several checkboxes. You need the first one saying “Allow untested iOS version”, check it and click on “Back” button:

Next Checkra1n screen will display instructions on putting your device into [DFU mode](#) for the purpose of jailbreaking process initiation

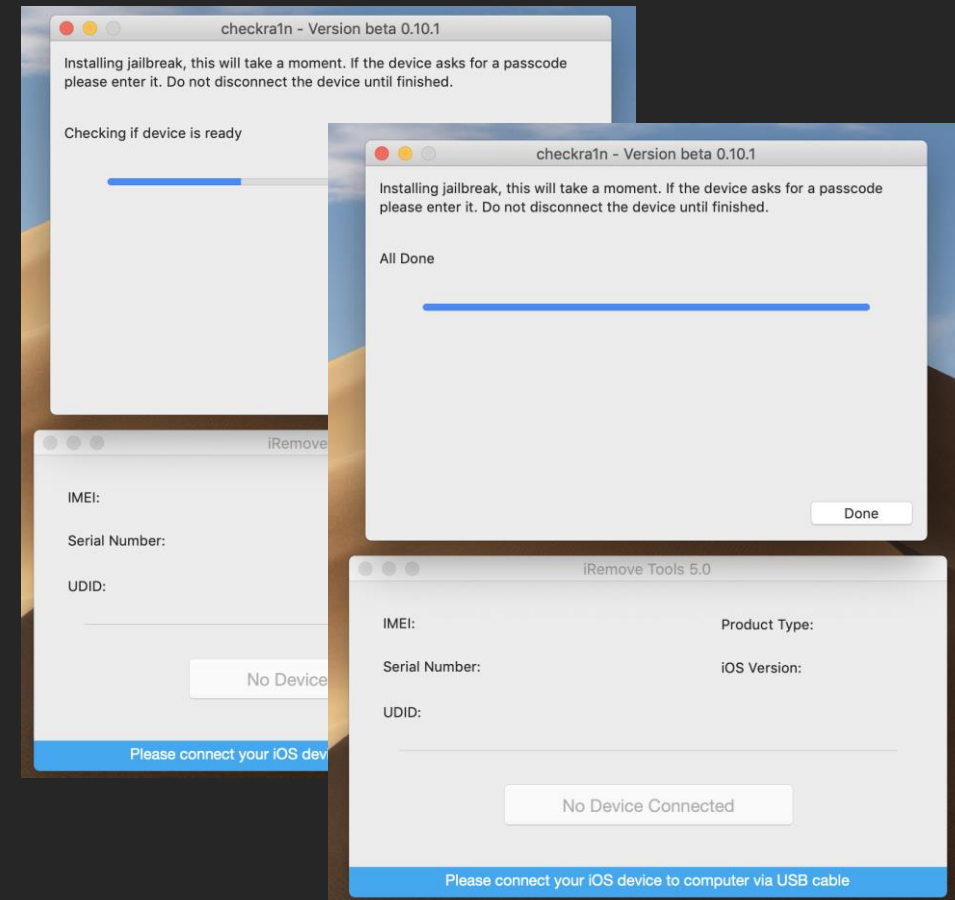

3

Jailbreak Device & Bypass Activation Lock Screen

The exploitation and jailbreaking processes will start once your device is in DFU mode. Verbose log of the jailbreaking process will be displayed on the device's screen throughout entire jailbreaking process. DO NOT do anything with your mobile device and Mac PC. Just be patient and let them do what they do. In case jailbreaking process is completed successfully, "All Done" message will appear. Please refer to common issues page if you receive error message.

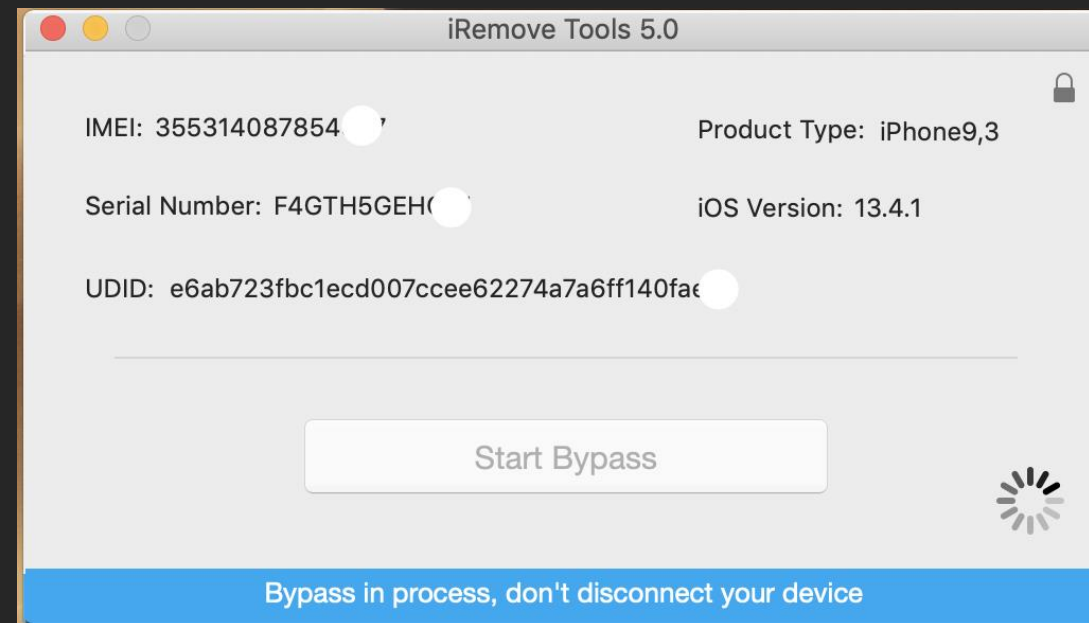

3

Jailbreak Device & Bypass Activation Lock Screen

After jailbreak completion, iRemove Software will recognize your device and suggest you to bypass Activation Lock Screen on your device. Click Start Bypass button to start the Activation Lock Screen bypassing process. Please do not disconnect your device until software will notify you that the bypass process is done!

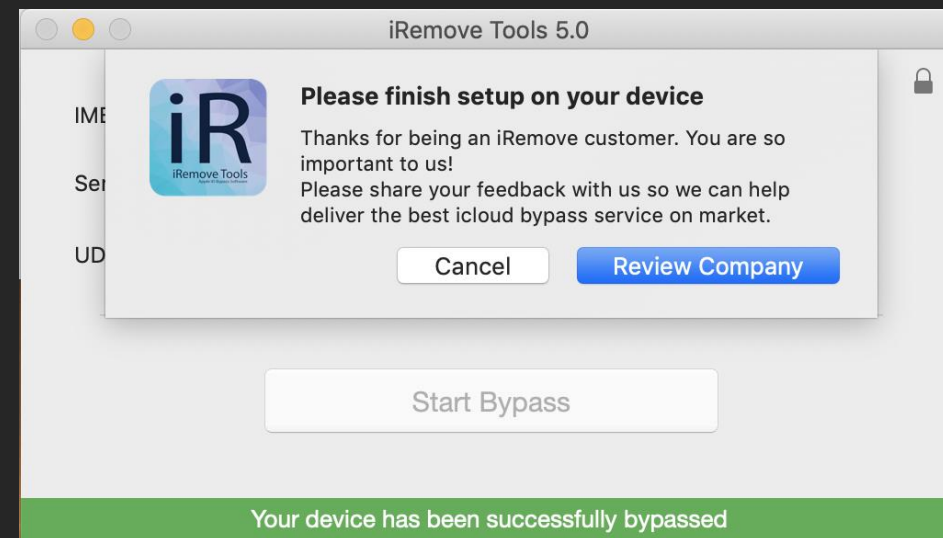

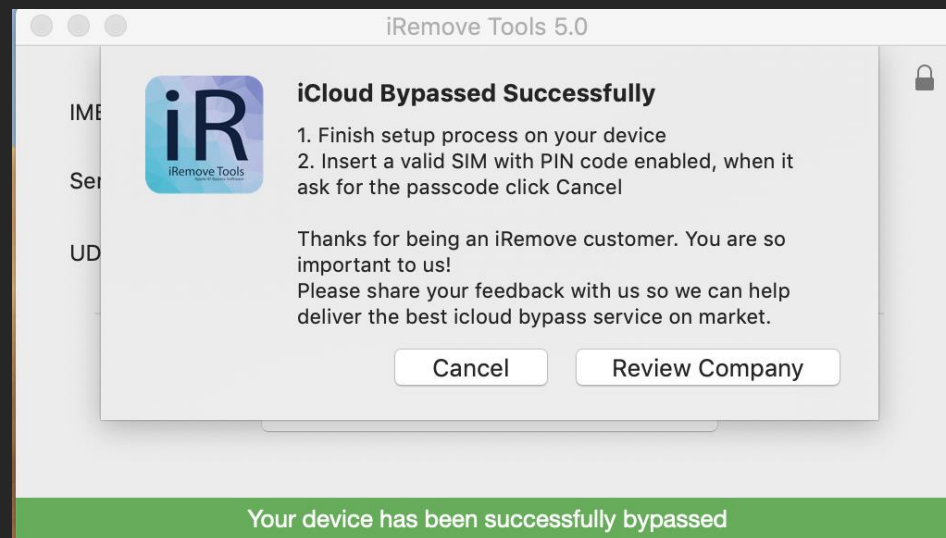

3

Jailbreak Device & Bypass Activation Lock Screen

After successful activation lock bypass on your device, iRemove Software will inform you by the following message:

- If you order service for the device with GSM module activation, you will get the next message
- If you order service for the device without GSM module activation, you will get the next message:

Thank for being an iRemove Software customer!

Thanks for being an iRemove Customer!
